

## High Performance Disinfection

### MBDes 50

50 l solution tank with scale  
Disinfectant pump 230 V  
with main switch  
20 m hose with pistol  
and disinfection lance

#### Soaking control

Pressure increase to soak and cool  
Alzogur Output Set

Länge: 0,60 m  
Breite: 0,45 m  
Höhe: 1,10 m

### MBDes 200

#### Equipment

200 l solution tank with scale  
Disinfectant pump 230 V  
with main switch  
20 m hose with pistol  
and disinfection lance

#### Zusatzausstattung

Soaking control  
Pressure increase to soak and cool  
Alzogur Out Set

#### Maße

0,80 m  
0,62 m  
1,47 m

## Disinfection

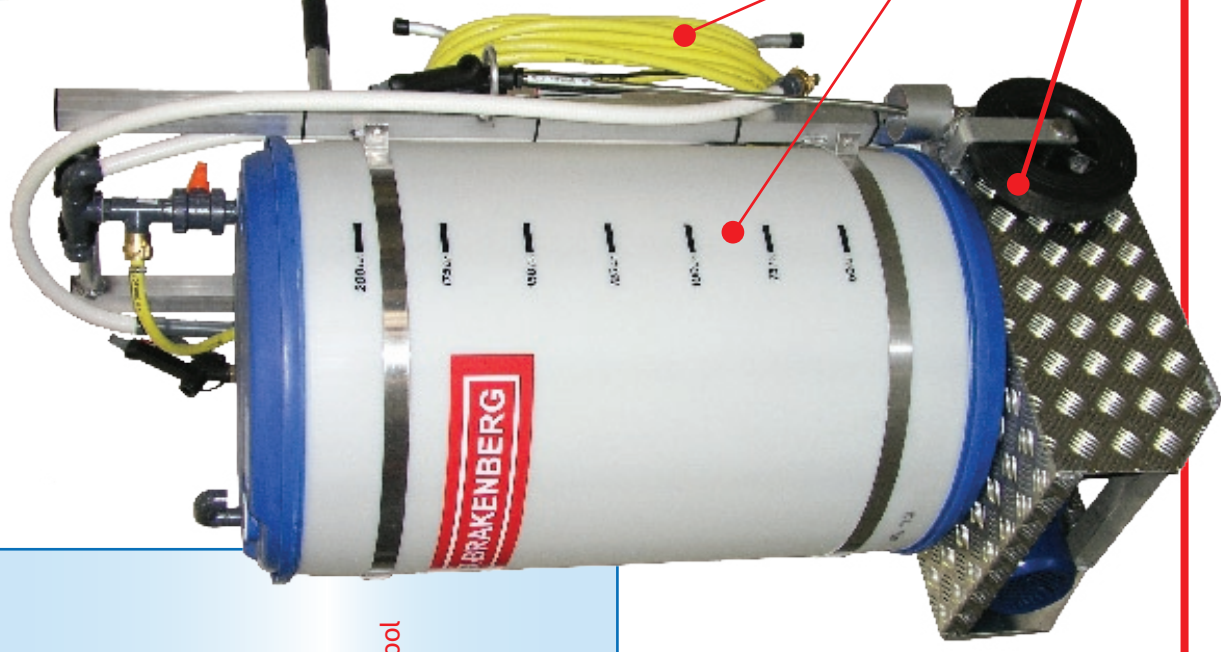

- Disinfectant lance made of high-grade steel with pistol and flat stream jet
- Large output for best performance
- Application:
  - Disinfection of stable corridors, compartments, loading ramps
  - Disinfection of agricultural vehicles
  - Disinfection of grain silos
  - Disinfection of agricultural vehicles
  - It's possible to disinfect whole stables by using Meiers' Soaking Unit. You only have to connect the disinfection cart with the Soaking Unit.

## Alzogur Output Set (Additional equipment)

- Intake of Alzogur by suction lance directly from the 200 litre Alzogur barrel, without manual operation
- Bypass valve to stir up and regulate solution
- Output of Alzogur with special large drop safety sprinkler head
- High performance by the large barrel, for Alzogur output over 200 m<sup>2</sup> barnstable area
- It's possible to flushing out the slatted floor after the time of appealing by the same tool

- Disinfectant cart made aluminium
- High-performance disinfectant and Alzogur suction pump
- Easy Handling like a wheel barrow

- 20 metre hose on holder
- 200 litre solution tank with scale for approx. 200 m<sup>2</sup> surface area for use of Alzogur and approx. 500 m<sup>2</sup> moistening area for use of disinfectant
- Large smooth running wheels
