

MEIER-BRAKENBERG

Pressure Cleaner

This flexible high-pressure cleaning device is suitable for professional use. The device copes with high load application in stables due to its solid and at the same time light construction and top-quality components, e.g. solid pump and durable plunger pump.

A survey at 1200 pig keepers investigated their needs and experiences. The findings of this survey helped designing this very user-friendly and ergonomic high-pressure cleaning device. Excels by slim design and useful details.
